PROFESSIONAL SUMMARY

Computer Science Engineering student (Cyber Security specialization) with hands-on experience in application support, troubleshooting, and production issue diagnosis gained through a web development and testing role and an SDE internship. Skilled in SQL-based data validation, root-cause analysis, structured bug/incident documentation, and Git/GitHub workflows, with solid networking fundamentals (TCP/IP, routing, switching). Fluent in English and Telugu with strong cross-functional and user coordination skills. Seeking the Associate Engineer – Operations Engineering role to support reliable application and service operations.

TECHNICAL SKILLS

- Application & Technical Support:** Issue diagnosis, troubleshooting, production support, incident reporting, root-cause analysis, user and stakeholder coordination
- Databases:** SQL queries and data validation (PostgreSQL, SQLite, Supabase)
- Networking:** TCP/IP, routing, switching, network troubleshooting (CCNA)
- Scripting & Tools:** Python, JavaScript, REST APIs, Git/GitHub, CI/CD workflows
- ITSM Platform:** ServiceNow (CSA and CSD certified)
- Documentation:** Ticket-style bug reports, test results, structured issue tracking and documentation
- Languages:** Telugu (fluent), English (fluent)

PROFESSIONAL EXPERIENCE

Web Development & Testing Specialist — Netmaxin Group (Remote)

Aug 2024 – Mar 2026

- Diagnosed and troubleshooted application issues, debugged defects, and verified fixes to support production stability and reliable releases.
- Logged and tracked bugs in a structured, ticket-style format with clear steps and results for team visibility and traceability.
- Performed functional and workflow testing to validate application features and UI/UX behavior across modules.
- Coordinated with design, development, and QA teams to resolve issues on time; also developed and maintained web applications.

SDE Intern — HPS

3 Months

- Contributed to feature development and debugging across application modules as part of a software development team.
- Investigated and resolved reported issues using structured troubleshooting and root-cause analysis to restore expected behavior.
- Used Git/GitHub for version control; collaborated to test, review, and document changes before release.

PROJECTS

CertiFlow — Certificate Generation & Verification Platform

React, Supabase (PostgreSQL, Auth, Storage, Edge Functions)

- Automated internship certificate issuance with instant QR-code-based authenticity verification, removing manual paperwork.
- Designed the database schema and duplicate/status validation checks used to verify each certificate record.

Autonomous API Attacker Agent (A³-Agent) — API Business Logic Security Testing

OpenAPI/Swagger, REST APIs, API Security Testing

- Designed an autonomous agent that parses OpenAPI (v2/v3) specifications into an API graph of endpoints, schemas, and dependencies to generate adversarial requests.
- Defined detection of authorization bypass, invalid state transitions, and logical inconsistencies using edge-case payloads such as boundary values, type confusion, and mass assignment.
- Specified reports with severity, confidence score, example request/response, and remediation guidance, with safe-mode and rate-limiting controls.

SathyaBhoomi — Smart Land Measurement Tool

React, GPS API, Interactive Mapping

- Built a mobile-friendly tool enabling farmers to measure land area accurately without survey equipment.
- Tested map-based inputs for accuracy and reliability under real-world field conditions.

EDUCATION

B.Tech, Computer Science & Engineering (Cyber Security) — MVGR College of Engineering, Vizianagaram

2023 – Present

CGPA: 6.92 / 10.0

CERTIFICATIONS & ACHIEVEMENTS

- CCNA Certified:** Cisco networking fundamentals covering TCP/IP, routing, switching, and network troubleshooting.
- ServiceNow Certifications:** Completed CSA and CSD.
- First Prize – Cybersecurity Workshop (2025):** Won 1st place for network diagnostics and problem-solving in a technical challenge.
