SUMMARY

Computer Science Engineering student specializing in Cyber Security with hands-on experience building scalable web applications, integrating AI/ML tools, and conducting rigorous software testing. Demonstrated ability to take ownership of real-world deliverables, collaborate cross-functionally, and apply analytical thinking to improve system stability and user experience. Passionate about building secure, scalable, and user-centric digital solutions within large-scale technology ecosystems.

EDUCATION

MVGR College of Engineering

B.Tech, Computer Science & Engineering | CGPA: 7.12 / 10.0

Vizianagaram, India

2023 – Present

PROFESSIONAL EXPERIENCE

NetMaxin Group

Software Engineering Freelancer

Remote

Oct 2024 – Jan 2026

- Developed and improved application UIs using modern web technologies to enhance usability, engagement, and overall user experience across production-grade products.
- Identified, debugged, and resolved critical software defects through systematic root-cause analysis, improving system stability and reducing runtime errors across multiple modules.
- Conducted end-to-end integration testing across distributed software modules, ensuring seamless interoperability and validating expected system behavior under varied inputs.
- Evaluated AI/ML-based tools for reliability, functional accuracy, and user satisfaction; synthesized structured feedback into actionable product improvement recommendations.
- Collaborated with cross-functional stakeholders across design, development, and QA to deliver product enhancements on schedule, aligned with business requirements and quality standards.
- Documented bug reports, test results, and improvement recommendations using structured formats, improving team-wide visibility and reducing resolution time for recurring issues.

PROJECTS

RecomInd AI | *Python, NLP, Hybrid Collaborative Filtering, React, REST API*

- Developed an intelligent e-commerce recommendation engine featuring a conversational chatbot interface that delivers personalized product suggestions using NLP and hybrid collaborative-content filtering techniques.
- Designed a scalable system architecture to handle large product catalogs efficiently, improving recommendation relevance and increasing user session engagement through context-aware filtering.

Chaos API Fuzzer (A³-Agent) | *Python, OpenAPI, Autonomous Agents, CI/CD Security*

- Engineered an autonomous security testing tool that parses OpenAPI specifications to auto-generate adversarial API requests targeting business logic flaws, state inconsistencies, and authorization vulnerabilities.
- Architected a modular, extensible agent framework designed for seamless integration into CI/CD pipelines, enabling continuous automated security validation across software development lifecycles.

SathyaBhoomi – Smart Land Measurement Tool | *React, GPS API, Interactive Mapping*

- Built a GPS-enabled web application allowing farmers to accurately calculate and manage farmland areas across multiple measurement units using real-time interactive map-based inputs.
- Prioritized accessible, intuitive UI design to ensure usability for non-technical users in rural settings, reducing onboarding friction and improving adoption rates among target users.

MoodWear AI | *React, Tailwind CSS, Rule-Based AI, Color Theory Algorithms*

- Built a React-based outfit recommendation web app that suggests clothing combinations based on user mood and gender using rule-based color matching algorithms (neutral, monochrome, complementary palettes).
- Applied color theory principles to engineer visually coherent outfit pairings; delivered a fully responsive, accessible interface using Tailwind CSS with real-time state management via React hooks.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript (ES6+), React, Tailwind CSS, HTML5, CSS3

AI/ML & Data: Natural Language Processing (NLP), Hybrid Filtering, Rule-Based Systems, AI Tool Evaluation

Software Engineering: REST APIs, OpenAPI Specification, Integration Testing, Debugging, App Testing, Scalable System Design

Security: Cyber Security Fundamentals, API Security Testing, Adversarial Request Generation, Authorization Flow Analysis

Tools & Platforms: Git, GitHub, Vercel, GPS/Mapping APIs, CI/CD Workflows

Soft Skills: Ownership & Accountability, Cross-functional Collaboration, Analytical Thinking, Curiosity-driven Learning

Languages: Telugu (Fluent), English (Fluent)
